Arteria Technologies Achieves SAP Accreditation for Partner Quality Program

*Quality Drives Customer Satisfaction and Implementation
Success for SAP Partner*

Bangalore, India — September 1st, 2015 — Arteria Technologies Pvt. Ltd., an SAP partner, today announced it has received accreditation for a global partner quality program by SAP SE (NYSE: SAP). The certificate was awarded by the SAP® Partner Service Delivery organization for Arteria Technologies' demonstration of clear quality standards and processes and in recognition of quality, risk and project management framework improvements in alignment with quality principles from SAP.

Arteria Technologies is closely aligned to the key principles of quality that SAP believes to be fundamental to the success of every implementation, designed to deliver high-quality software and support while providing the right processes, tools and services to drive successful projects and delivery.

Businesses today are continually challenged to manage risk in increasingly complex projects. As a certified member of the partner quality program, Arteria Technologies will be able to help SAP customers avoid escalations, maintain profits, reduce profit dilution and improve successful delivery through the program lifecycle. In addition, the program offers a quality approach for sales processes and delivery methodologies through access to enhanced SAP channel quality templates and processes. With a distinct focus on quality deliverables, the accreditation also helps partners improve the success of bids by providing a sales differentiator from other partners through quality wording and information as well as risk mitigation activities.

"This accreditation is a credit to our team and our commitment to providing customers with a clear view of SAP's ability to influence the success of its program," said Prakash V, Manager Quality, Arteria Technologies. "By using SAP quality principles, we can help ensure that our customers achieve smooth implementations as we anticipate benefits as measured against business requirements. This accreditation reaffirms the work we do to enable effective implementation of business processes using SAP solutions and to fulfill requirements to the highest standard."

The annual partner quality plan and quarterly quality reviews form the basis for the global partner quality program by providing a way to monitor joint performance and measure success. Partners are required to submit an annual quality plan to showcase how they will improve quality in their own organization during the year. In addition, the quarterly quality review enables joint risk monitoring via open bilateral communication as well as identifying and preventing issues.

About Arteria Technologies Pvt. Ltd.

Arteria, an SAP silver partner, blends high-value IT management consulting with right-shore excellence to deliver high-quality solutions to customers economically. Arteria offers a suite of portal and mobility based solutions that can help organizations to extend their on-premises data to external partners (e.g., distribution network including secondary and tertiary sales, suppliers and subcontractors). These solutions have helped organizations with the tracking and collation of data from their partner ecosystem and the integration of this data with SAP solutions. The resulting business benefits are extremely beneficial to business managers.
