TATA AUTOCOMP SYSTEMS LTD

Is your company facing ...

- Large and quickly growing SAP systems, causing increasing infrastructure and maintenance expenses?
- The need to test and validate your in-house developments early on with real business data?
- The challenge to scramble sensitive data in development, test, quality assurance and training environments?
- Multiple parallel IT projects affecting different organizational units with diverse project timelines?
- Demand to simulate new business situations?

Consider implementing a solution that helps you to create lean and consistent development, test, quality assurance and training environments based on real business data

Value to You

REDUCED INFRASTRUCTURE EXPENDITURES

Reduce your disk space by decreasing the data volume in your development, test, quality assurance and training systems

IMPROVED QUALITY

Improve quality of development and training activities by using business-relevant and up-to-date test data

INCREASED EFFICIENCY

Increase development efficiency by reducing the administrative efforts and time required to manage your development and test systems

HIGHER FLEXIBILITY

Support independent project schedules by selectively refreshing single clients of your development, test and quality assurance systems

DECISION SUPPORT

Effectively simulate new business situations in your test environments using up-to-date data before taking critical business decisions

OUTSOURCING

Reduce testing expenses by outsourcing those activities to low-cost countries while keeping sensitive data anonymous thus ensuring legal compliance.

Resulting in REDUCED COST while INCREASING QUALITY in development and training activities

About SAP Test Data Migration Server

SAP Test Data Migration Server is a high-speed data extraction tool that populates your development, test, quality assurance and training systems with SAP business data from your live productive environment

- Choose the set of data to be extracted from your productive system:
 - Repository and client-independent data
 - All master and configuration data
 - Time slice of transactional data in addition to master and configuration data
 - Time slice of transactional data in addition to master and configuration data belonging to a specific organizational unit (e.g. company code)
- Load the selected productive data into your development, test, quality assurance and training system using high-speed data migration technology
- Selectively and flexibly refresh single clients in the target system

Success at Customers

“

Thanks to SAP Test Data Migration Server we were able to massively reduce the amount of data in our non-productive systems by 70% and more.

Dr. Klaus-Ulrich Meininger,
Head of IT-Systems, LMH

“Using SAP Test Data Migration Server enables us to significantly improve the quality of our in-house development, because development work is no longer interrupted by repeated time-consuming transports for testing purposes.”

Alexander Angermann,
SAP Basis Lead, Behr Group

How to Get Started

SAP Test Data Migration Server

Technical Details

- Tool installation on: SAP WebAS 6.20, 6.40 or 7.00
- System environments managed: SAP R/3 4.6C, 4.7, ERP 2004 & 2005
- Languages supported: English, German, French, Japanese

Implementation

- Implementation Services offered by Arteria Technologies

Knowledge Transfer

- End users trained on TDMS before hand over after the project completion

Maintenance

- SAP Standard Maintenance

More Information
