

Testimonial

ARTERIA®

Prism Cements, a leading cement company manufacturing Commercial grade cements, Cement Tiles and Ready Mix concrete deployed mDepot to better manage the depots at remote locations including the inventory, distribution and routing. The App's innovative features and efficient use of the technology and platform provides real-time decision-making capabilities while increasing customer and dealer satisfaction and loyalty. The App effectively works in an offline mode which is an extremely important aspect removing the dependency on complex communication infrastructure

Arteria has been a key innovation partner for us and their solution mDepot has provided us critical edge over competitors. We are able to leverage their expertise in business and technology to extend our SAP business processes to our distribution network. The team has been hands-on and worked very closely on the ground with our depots to understand the requirements and come up with a long term and viable solution that can work in hostile & remote environment. We appreciate Arteria's drive for excellence and approach that has enabled us to deploy business solutions for challenging requirements while achieving a definitive market growth and securing newer markets – Naresh Gupta, SVP – IT, Prism Cements

The company's top objectives

- Real time inventory tracking at remote depots: Goods Receipt and Goods Issue at remote depots with limited/NO infrastructure to be captured into SAP
- Improved Order Fulfilment: Branch sales team to fulfil distributor orders based on accurate depot inventory
- Manage Goods Movement: System driven goods movement (FIFO / Batch based) with transparency and accountability over the transaction

The solution - mDepot

- SAP Mobile Platform based application for transactions such as order entry, goods receipt, good issue, invoicing, collection & reports to be carried out at remote warehouses & depots
- Enables the remote depot personnel to work offline & synchronize back with SAP backend systems

The key benefits for the customer/providers

- Near Real time stock information at all depots leading to reduced stock outage and better inventory mgmt
- Better sales planning & increased market share & entry into newer markets
- Reduced claims / disputes with depot & distributors
