

VE Commercial Vehicles Limited is a 50:50 joint venture between the Volvo Group (Volvo) and Eicher Motors Limited (EML). It is a partnership that brings together Global leadership in technology, quality, safety and environmental care, along with the deep knowledge and understanding of the Indian Commercial Vehicle (CV) market. VE Commercial Vehicles Ltd. (VECV) owes its inception to the compelling intent of driving modernization in commercial transportation, in India and other developing markets. VECE deployed the app SCA (Supplier Connect Advantage) from Arteria to leverage the features and functions that would help them drive collaboration & high quality standards at all stages – Raw materials to spares to semi finished goods including vendor/supplier management and development

The application is scalable and is giving an acceptable response time for transactions, provides real time data information from SAP and has helped in ensuring a smooth material flow in the plant. During the course of the project and the interactions held with your team members, we have found your team to be extremely professional and willing to take that extra effort for understanding the customer requirement and even challenging us to improvise our overall process- Ajay Khanna, Vice President IT, Volvo Eicher Commercial Vehicles

The company's top objective is to avoid

- Reduced high inventory and out-of-stock situations
- Eliminate discrepancies between ordered and received items.
- Reduced or eliminate unexpected receipts - late, partial, and unknown shipments
- Synchronized replenishment and supplier delivery
- Automatic shipment notifications and challan
- KPI monitoring using Supplier score card

The solution - SupplierConnect Advantage

- A strategic platform that extends business process beyond four walls to suppliers and contract manufacturers.
- Supplier Collaboration: Forecast, PO, ASN, Invoice, Payments
- Outsourced Manufacturing: End-to-End Subcontracting Processes
- Quality Collaboration: Quality Notification, RCA Process

The key benefits to the customer

- Cost reduction in excess of 10% through reduction in physical material stock
- Enhanced Supplier Satisfaction & better pricing advantage
- Achieve better component quality through Synchronized feedback to suppliers
- Reduction of more than 50 % waiting time for material offloading through automation of transactions
